I. INTRODUCTION

The internet today, is a widely used platform for online shopping. This enables different purchasing options. There is an increase in stylists that help with designing wears daily, which in turn increases online stores' competitive rate. With the use of price-comparison websites, it eases the search for online clothing stylist, by posting reviews from previous customers. Despite its numerous advantage over offline shopping, patronizing an online clothing stylist also has some disadvantages attached to it

Advantages Of Online Fashion Stylist Website:

1. There are no time restrictions to when research can be made. 2. Using an online clothing stylist involves no transportation hassles, such as traffic, parking trouble or shortage of fuel. 3. It saves time, as there is no need to wait in long queue, and no dealing with annoying crowds. 4. Shoppers can patronize online clothing stylist at their convenience. 5. Using an online stylist reduces the chance of dealing with an aggressive salesperson, as online stylists undergo intensive trainings about their products than local stylists.

Disadvantages Of Online Fashion Stylist Website :

1. It is difficult to trust an online clothing stylist or determine if the site of purchase is legitimate. 2. Using an online clothing stylist limits the power to negotiate payment terms and price. 3. There is no certainty that the same person is being interacted with when a problem occurs.

II. LITERATURE REVIEW

Any work that previous any developer or researcher did, mention them in a few words.

III. PROPOSED METHODOLOGY

The methodology you work, explain here with code and other items.

Fig. 1. Example of a figure caption.

IV. CONCLUSION AND FUTURE WORK

In future, I will add many category and live chat customer can talk about their problem.

ACKNOWLEDGMENT

I would like to thank my honourable **Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
